

Renz-Enald H. Sicat

rnzgtswgg@gmail.com | 09358658769 | Valenzuela City

A results-driven developer with 5 years of total programming experience, including 3 years in web development using Laravel and Angular, and 2 years in desktop application development using C# (WinForms/WPF). Skilled in building efficient, scalable, and user-friendly solutions across both web and desktop platforms.

Experience

Monarch One Solutions & Technology Services, PROGRAMMER (OJT)

July 2019 - December 2019

Analyzed and designed relational databases to support application requirements. Developed desktop applications using C# and SQL Server, and worked across the full software development life cycle—from gathering client requirements to building, testing, and maintaining code that improved the speed of customer data requests. Actively participated in client meetings to gather project specifications and other necessary information. Also responsible for creating and managing reports using Crystal Reports.

California Computer Technology Inc. , PROGRAMMER

January 2020 - September 2022

Analyzed and designed new algorithms based on user requirements to enhance system functionality. Revised and updated existing development projects to improve performance and usability. Collaborated with clients through meetings to gather detailed requirements and with the technical team to resolve system issues. Conducted user training and system demonstrations to ensure proper usage and understanding. Performed testing and troubleshooting to identify and fix software errors, and generated a series of customized reports as requested by clients.

JE310 Solution Inc. , WEB DEVELOPER

October 2022 - Present

Developed and maintained responsive websites and web applications using HTML, CSS, JavaScript, PHP, and Laravel, ensuring cross-browser compatibility and mobile responsiveness. Utilized Angular and TypeScript to build dynamic single-page applications, incorporating modals, user forms, and custom validations. Conducted system training for users and provided ongoing support by identifying and resolving bugs and system errors. Debugged and optimized code to enhance performance, resulting in faster page load times and improved server response. Maintained and enhanced existing web applications to ensure smooth operation and support critical business processes.

BACKEND WEB DEVELOPER (Freelance), Imagic Agency Inc.

May 2025 - Present

Developed and maintained scalable web applications using PHP and Laravel, with a strong focus on performance, security, and code reusability. Designed and implemented RESTful APIs to support frontend applications and third-party integrations. Collaborated with cross-functional teams to gather requirements and deliver backend solutions that enhanced system reliability and user experience. Optimized database queries and schema design using MySQL and PostgreSQL, resulting in improved response times and reduced server load. Integrated various third-party services including payment gateways, email providers, and file storage solutions. Ensured application security by implementing authentication, role-based access control, and thorough data validation. Used Git for version control and actively participated in code reviews to uphold code quality and consistency. Maintained API documentation and wrote unit tests to support continuous integration and code reliability.

Education

Global Reciprocal Colleges

Bachelor of Science in Information Technology (BSIT), - Present

Skills

C#, HTML, CSS, SQL, PHP, Laravel, Angular, TypeScript, JavaScript, React, MySQL, SQL Server
